

We hope this message finds you well. We're excited to introduce you to an important aspect of our commitment to student safety and well-being: the Emergency Management Module within our Reach Student Life Management Software.

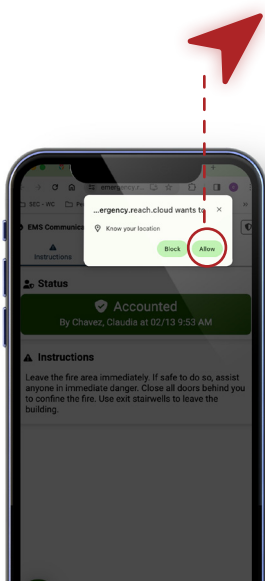

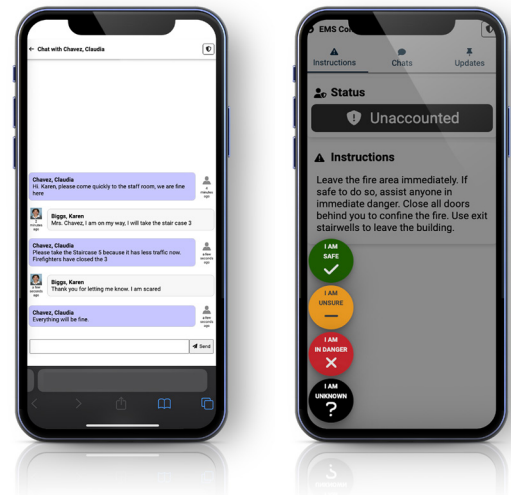

The safety of our students is our top priority, and we are continuously exploring ways to enhance our emergency preparedness measures. To this end, we have implemented the Reach Student Life Management Software, a comprehensive tool designed to streamline various aspects of student life, including emergency management.

The Emergency Management Module is a crucial component of this software, providing us with a centralized platform to efficiently respond to and manage emergencies. Here's what you need to know:

1. Real-time Communication: In the event of an emergency, the software enables instant communication with all stakeholders, including faculty, staff, and emergency responders. This ensures that everyone receives timely updates and instructions to keep our students safe.

2. Emergency Status Indication: The Emergency Management Module allows individuals to swiftly indicate their status in an emergency situation. Whether they are Safe, In Danger or Unsure.

3. Community Member Accountability: During emergencies, accounting for all community members is essential. The software provides us with the ability to track and verify the location of students, faculty, and staff, ensuring that everyone is safe and accounted for in a timely manner.

Additionally, we want to inform you that Reach Student Life Management Software will request GPS/location sharing during an active emergency. This feature is solely utilized to ensure the safety and well-being of our students, enabling us to accurately track and respond to their whereabouts in real-time and only during an active emergency.

We understand that nothing is more important than the safety and well-being of our students. With the Reach Student Life Management Software and its Emergency Management Module, we are better equipped to handle emergencies and ensure the security of everyone within our school community.

If you have any questions or concerns regarding the Reach Student Life Management Software or its Emergency Management Module, please don't hesitate to reach out to us. Your feedback is valuable as we strive to maintain a safe and nurturing environment for all our students.

Warm regards,
Reach Support
